BATTLING FOR IRON DEPOSITS

Two Crowds Working in New York for Bull Valley Properties.

TUNNEL IS NOW COMPLETED

It is related that the affairs of the Nevada-Utah company, as such, were not the only matters nor the most important which decided A. B. Lewis to set aside his senatorial duties in the legislature and pull out hurriedly for New York. There is reason to believe that there is now a mighty struggle on for possession of the iron deposits in the Bull valley country, below the line of the San Pedro. That State Senator Lewis has set his heart upon landing that from either for his Nevada-Utah company or for some entirely separate and distinct combination, seems morally certain. Whether he will be able to land the prize is a different proposiand distinct combination, seems morally certain. Whether he will be able to land the prize is a different proposion entirely, for others are in the race r it against him. Information reached here from the

east vesterday to the effect that Mr. Lewis had a short time call on the bulk of the Bull valley iron and that to secure it he lad put up a nice little sum of money. It was also reported that interests just as powerful, if not more so than those behind Lewis, were determined to have the self-same iron and nined to have the self-same iron and the letter said that it looked as though the Lewis side could not move rapidly enough to check the game of the other

While this information is vague, it serves to show that there is the keenserves to show that there is the keen-est kind of rivalry to get possession of the deposits mentioned. Several months ago options were sought on this iron and it is understood that minor hold-ings were, for a time, tied up. The propositions then under way all failed of full fruition because two combina-tions were in the field against each oth-er and peither was able to get inst er, and neither was able to get just what it wanted. How the matter stands at the present time is not shown in the correspondence referred to, but the belief is that title to practically all of the Bull valley iron is now where it can be delivered if the terms of the various owners are agreed to. It seems to be a case of "first come, first served," and with Mr. Lewis pitted against some of the strongest iron and steel interests in the country.

TUNNEL IS COMPLETED.

Butler-Liberal Will Now Raise to Vein and Drain It.

By tonight it is expected that the new tunnel of the Butler-Liberal company will have been completed to the 1,500-mark, the distance it was originally intended to drive it. At this point Manager A. L. Jacobs will order a raise made to connect with the winze sunk from the old tunnel workings to a depth of seventy feet and where the flow of water made farther sinking, without pumping machinery, out of the question. A raise of ninety feet, it is expected, will make connections and then both the new and old workings of the mine will be drained and thorough-

As soon as these connections are made and mining through the lower tunnel has been gotten under way, a cross-cut for the company's Leona vein will be started. To reach it, Manager Jacobs states will require from 270 to 3800 feet of drifting, while the vein will be opened at a vertical depth of 400 feet, and considerably more than that on its dip, which is toward the southon its dip, which is toward the so west or in the direction of the drift which is to be sent out to tap it. The Leona vein carries fine values in

copper, some silver and gold and the management of the property is con-vinced that at depth it will form a junction with the Butler veins which dip in almost the opposite direction from the Leona. With the raise into the Butler vein and this cross-cut to the Leona ledge completed, the dead work to come and the interests of shareholders can then receive attention more to their liking.

TINTIC'S NEW ENTERPRISE.

Consolidation of Ground North of Victoria Nearly Rounded Out.

P. J. Donohue's proposition to consolidate several claims adjoining the Victoria on the north and lying along the easterly side lines of the Eagle & Blue Bell at Tintic, is moving along slowly but surely. One or two eastern parties are to be heard from yet, and when they are there is little or medoubt that Mr. Donohue's company will be quickly formed and operations a the property begun. On the north of this block of ground

which includes the American Star Blackbird, Townview and Granite, I the town of Eureka. On the east, wes and south the territory is surrounder by producing mines, such as the Tetro Eagle & Blue Bell and Victoria.

Engineer Donohue, who has made a great deal of study of the formation and the surroundings, gives it as his unqualified opinion that the fissure which makes so rich in the Victoria on the south end of the property, will be found in his ground. Not only that, but he states that he already has assurances from neighbors that justifies him in saying that the new company's challenge Con. 28 Overman ... 27 Overman ... 28 Overman ... 27 Overman ... 27 Overman ... 28 Overman ... 27 Overman ... 27 Overman ... 27 Overman ... 27 Overman ... 28 Overman ... 28 Overman ... 28 Overman ... 28 Overman ... 29 Overman

The ground secured, Mr. Rooklidge believes, is going to turn out rich, and it has been decided to test it at some little depth. More information on the subject is expected when a letter is received from the captain, during the next few days. It is now only ninety days since Messrs. Flindt and Rook-

Dull Day and Prices Generally on Down Grade.

BUTLER-LIBERAL READY TO TAP

ITS LEDGES.

The mining share market was altogether to the bad yesterday. Trading was light, and, with isolated exceptions the trend of prices was downward.

The first transfer of Daly-West in several days was made, ten shares being allowed to go at \$15.25. Daly failed to score; buyers were offering \$2.50 to \$2.5%, but the lowest price made by holders was been severally also but the lowest price made by holders was been severally also but the lowest price made by holders was been severally also but the lowest price made by holders was been severally also but the lowest price made by holders was been severally also but the lowest price made by holders was been severally also been severally

dodfield. They were joined early in the present year by Captain Tibbitts, and while they have had only about one month's good work in way of prospecting, word comes that they are already in possession of good ground.

MINING STOCK EXCHANGE.

to have selected the Promontory end of the lake for their operations.

One is a Los Angeles crowd and it is preparing to erect a plant at or close to the seepage wells of the Ogden company, which has been driving dry steam down into the fissures to make the congealed liquid asphalt flow. By those who met a representative of the Los Angeles crowd the belief was expressed Angeles crowd the belief was expressed that the Californians had become identified in some way with the Ogden company and that a well would be sunk on its ground.

from Chicago. It has secured large holdings almost due north from the seepage wells on the edge of the lake, and adjoining territory on which a rig is now at work, and which has attained a depth of several hundred feet since last fall. The new converges

Commenting on the affairs of the United States Mining company, Hayden, Stone & Co., of Boston, in their latest market letter say:
"The directors declared their regular semi-annual dividend of 50 cents per share at their meeting last Friday, payable Feb. 15. We hope and believe that a statement will be sent to the stockholders with their dividend checks, showing thoroughly the financial con-

stockholders with their dividend checks, showing thoroughly the financial condition of the company.

"As outlined in our letter last week, the directors, for their own information, have been having their books carefully audited and the figures should be ready by this time. The directors, however, have no intention of allowing any literary attacks to coerce them into any policy with which they are not in full accord.

Ore and bullion settlements in this city vesterday, as reported by McCornick & Cornick as reported by McCornick & Cornick as follows: Sil-ver, lead, gold and copper ores, \$47,200; base bullion, \$48,200; gold bars, \$8,650.

STRONG POINTS -IN THE MARKET

General List Well Sustained in Consequence.

The other combination is said to hail RISE IN UNION PACIFIC PRICES WERE WELL HELD AT THE CLOSE.

> New York, Feb. 8.-The stock market had its strong points today which acted with sustaining effect on the general list in accordance with the precedent of several days previous. The movement in Reading and Ontario & Western was carried over from yesterday. But on the other hand yes-terday's buoyant rise in Norfolk & Western, Atchison, Tennessee Coal and some others showed evidence of having run out and halted or turned back today. There were news developments of interest and of importance, but Price movements showed no direct re-flection of these influences. Yester-day's rise in Atchison unexplained at the time, found the motive in the elec-tion today of H. C. Frick and H. H Rogers to the board of directors. Wall street regards this as confirmation of a report now several months old of an extension of holdings in this prop-erty in the interest of Union Pacific domination in the transcontinental rail-

road field. This particular report had long drop ped out of sight and had not figured in the recent busy rumors of railroad deals. It is the first really substantial "We do not believe any bona fide stockholders have ever had any difficulty in getting a clear statement of the financial condition of the company from the officers, but we do believe that it is better policy to have such statements sent to all the stockholders and then the ground for criticism is removed."

Ore and Bullion.

deals. It is the first really substancial evidence, however, that has come to the public to corroborate the belief that the particular party of financiers thus represented is reaching out for extension and consolidation of control in the railroad field. To this extent it served to revive confidence in some degree in other deal rumors which have been influential in the speculation. Union Pacific was the only one of the stocks immediately concerned to be much afimmediately concerned to be much af-fected today, Atchison itself, as has been seen, being subjected to realiz-

The rise in Reading and Ontario & Western had some explanation in the high rate of January production of an-thracite and in the reports of reduction of stocks on hand which is resulting from winter obstacles. But other members of the group of coalers were unresponsive, notably the Eries. The easier tone in the exchange market and the check to the export of gold to France had some effect on speculative sentiment, although large engagements for Cuba and South America served as a partly offsetting influence. Foreign discount markets were inclined to be easier and the price of gold was lower in London, while sterling exchange ad-

anced in Paris.

Peace rumors continued to affect the foreign markets and there was some huying here of stocks for foreign ac-count. Reports of further purchases of pig iron by the United States Steel cor-poration were regarded as a satisfac-tory index of the industrial situation, Mrs. Keith.
Engineer J. T. Breckon goes out to Stockton today to measure up the work and bring the maps of the Stockton Gold Mining & Milling company up to date. The second carload of concentrates from the company's new mill is now on the way to market.

Mrs. Keith.

Engineer J. T. Breckon goes out to but United States Steel stocks were not affected. There were many advances, however, at other points of the industrial list. There was some talk that New York, New Haven & Hartford was extending its holdings of Ontario the company's new mill is now on the way to market.

The old Colony & Eureka company has called for an assessment of one-tenth of a cent per share. The company is to be applied to paying the cost of a watchman at the property, insurance, etc. It will be delinquent March 14, with sale to follow on April 1.

Manager D. P. Rohlfing of the Frisco Contact Mining company's properties has just purchased from the Salt Lake Hardware company two sixty-horsepower boilers and two large heaters to be used, it is understood, at the Lulu company's property, which is also under the management of Mr. Rohlfing.

Lafavette Hanchett returned from a flying trip to Newhouse yesterday morning. He says the big boilers were being steamed up when he left camp, and within the next day or two the electric trains will begin plying between the mine and ore bins at the mouth of the tunnel. The new hotel of the company will be opened on Wednesday next, so the start of the mill will not be many hours behind that time.

New York, New Haven & Hartford was extending its holdings of Ontario & Western and this was held to account for the buoyant upshoot in that stock which served to support the market at the last and 'made the closing a strong. Previous to this the large realizing, which had been in progress all day had rather generally overcome the firmness of the market. The large number of offerings of new securities, which is an evidence in the financial advertise in evidence in the financial advertise is a factor in the prevailing strength of conditions in the investment market. Bonds were firm. Total sales, par value, \$6.410,000.

United Stats bonds were all undended the mill will not be many hours behind that time.

GRAIN AND PROVISIONS.

Chicago. Feb. 8.—Dullness to the point where trading was almost at a standstill was witnessed in the wheat nit today. Prices throughout the entire session showed a downward tendency. At the outset there was selling of July by longs, who felt that the general snowstorms throughout the winter wheat belt would make prospects of new wheat in July more reassuring. There was also some selling of May by commission houses. Lower prices at Liverpool had some effect on early trading. Initial quotations on May were off 1/44, at 1.01/401.01%. After July had sold off to 1.01% the price rallied to 1.01% on buying of a fair line by a prominent commission house. In sympathy May sold up to 1.16%. The support, however, was only temporary, the market soon becoming easy on lack of buying. One reason for the poor demand was the fact that the domestic situation as to existing supplies and general distribution apparently offered little encouragement to believers in higher prices. Reports from all sections told of lack of demand for flour, stocks of flour being reported as ample to meet the requirements of the trade for some time to come. Demand for cash wheat was correspondingly quiet. Receipts at Minneapolis was unexpectedly large. The increased arrivals formed probably one of the chief causes of moderate selling here during the day by houses with northwestern connections. Selling developed fair proportions late in the session and resulted in a weak feeling. Just before the close May sold off to 1.16. At the same time July dropped to 1.00% for May and 1.00% for July. Clearances of wheat the corn market held comparatively firm. May opened unchanged to a shade higher, at 45% to 45% 45% 45%. sold off to 45 and closed at 45%. Local receipts were 287.800 bushels. Primary receipts were 37.800 bushels. Primary receipts were 387.800 bushels a year ago.

Notwithstanding the weakness of wheat, the corn market held comparatively firm. May opened unchanged to a shade lower, at 30% 40% 40%. sold off to 45 and closed at 45% GRAIN AND PROVISIONS.

5,000 head.

Coffee and Sugar.

THE STOLEN HORSE.

An Old Proverb With a New Applica tion.

The woods are full of "so-called" remedies for Baldness.

You may call anything in creation a remedy, but to use them is like locking the stable after the horse is stolen.

Baldness and Dandruff are caused by a germ—if you don't kill the germ the germ will kill the halr.

Scientists have labored with the problem of a preventative for Baldness for many years.

Newbro's Herpicide is the product of a modern idea, and will cure Dandruff and prevent Baldness because germs cannot exist when you apply Herpicide. Herpicide is a valuable hair dressing and scalp disinfectant as well as a cure for Dandruff.

Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detailed by Fr. C. SCHRAMM, First South Detroit, Mich.

Supply Co.
